 - (d) A leopard cannot change its spots.
4. Make a precis of the following passage in about **one-third** of its original length and suggest a suitable **title** : 35

What is the future which awaits our children ? The underlying assumption of the question that Indian children have a common future is itself dubious. It can legitimately be asked whether a student who is

well-fed, attending a boarding school in a city, and learning to use computers has any future in common with a mal nourished child who goes to a school with no black-boards, if indeed he goes to school. The latter may have no worthwhile future at all. And it might be worthwhile to analyse the significance of this marginalization of more than 75 percent of the children of this country.

The failure to provide an infrastructure for primary education in the villages of India more than 60 years after Independence is in sharp contrast with the sophisticated institutions, for technical institutes of higher learning are funded by government with the money coming from taxes — both direct and indirect. Hence this financial burden is borne by all the people. According to L. K. Jha, 25 paise of every rupee spent on educating an IIT student comes from the pockets of those whose children may never enter a proper classroom.
